

## Visualizing the Unseen by Konica Minolta's unique software

### Bone Suppression Imaging (BSI)

Kasih Bunda Hospital is a Type C General Hospital, which started from the Maternity Clinic that was founded in 2008, and has developed into the Kasih Bunda Maternity Hospital in 2012.

#### Vision

The realization of the best hospital in providing fast, precise, professional and compassionate health services.

#### Mission

1. Provide integrated health services for all levels of society at affordable costs.
2. Creating a safe, comfortable, beautiful and clean hospital environment.
3. Improve the quality of human resources in accordance with the development of health science and technology.

Radiographer Dr. Ahmad says that BSI can provide more sharp/clear images and is helpful for diagnosis of Tuberculosis and even for suspected COVID-19 case.

BSI can show more accurate images so it can be used consistently for some thorax images.

Kasih Bunda Hospita started to use Aero DR NS with BSI and it has been improving not only the efficiency of interpretation but also for its workflow so that more patients from pulmonogis can be diagsosed.

This effeiciency was not realized with CR (Computed Radiogrhap).)

Dr. Ahmad is sayng Konica Minolta`s Aero DR NS with BSI system is really unique and is helpful for its workflow.
